Portfolio: [My portfolio](#)

Address: Bahir Dar, Ethiopia

Professional Summary

AI/ML Engineer & Data Scientist with hands-on experience in NLP, Speech-to-Text (STT), Text-to-Speech (TTS), and computer vision. Skilled in Python, TensorFlow, PyTorch, FastAPI, and AI pipelines, I have developed end-to-end AI solutions from data preprocessing to deployment. Passionate about building production-ready models and solving real-world problems through AI while collaborating effectively in remote and research-driven teams.

Skills

Technical Skills

- **Programming:** Python (NumPy, Pandas, Matplotlib, Seaborn), R
- **AI / ML:** NLP pipelines, STT/TTS, Chatbots, LSTM, Transformer models, CNN, Regression, Classification
- **Data Science Tools:** Scikit-learn, TensorFlow, PyTorch, OpenCV, Power BI
- **Deployment:** Streamlit, FastAPI, Git, GitHub

Software Tools

Cursor, VS Code, PyCharm, Google Colab, Kaggle, Jupiter Notebook

Soft Skills

- Problem-Solving & Analytical Thinking
- Team Collaboration & Communication
- Adaptability & Continuous Learning
- Time Management & Task Prioritization
- Leadership in Group Projects

Work Experience

Data Science Intern – INSA, Addis Ababa, Ethiopia | Jun 2025 – Sep 2025

- Developed **computer vision solutions for object detection** in security imagery.
- Built **Amharic speech-to-text NLP models** for audio transcription and analysis.

Machine Learning Intern – Future Interns, Remote | Oct 2025 – Nov 2025

- Built sales forecasting and churn prediction models with Python, XGBoost, Prophet, and Power BI.
- Developed a smart **NLP chatbot** for customer support, deployed with Rasa, GPT, and Streamlit.

Football Tracking Data Preparation Intern – Addis Ababa University | Dec 2025 – Present

- Prepare and clean large-scale **football tracking datasets** for analysis.
- Assist in structuring **spatiotemporal data** for player tracking and movement prediction.
- Collaborate with a research team to support **data-driven sports analysis projects**.

AI Engineer Intern – CodeCelix, Remote | Dec 2025 – Mar 2026

- Developing AI solutions for practical applications in software and data analysis.
- Work on **machine learning pipelines**, including data preprocessing, model training, and deployment.
- Gain hands-on experience in **team collaboration and real-world AI project management**.

Projects

Computer Vision & AI Projects

- **Object Detection in Security Imagery** – Developed CV models using **OpenCV & PyTorch** to detect objects in images.
- **Football Player Tracking Data** – Cleaned and structured **spatiotemporal datasets** for player movement analysis.

Machine Learning & Data Science Projects

- **Credit Card Fraud Detection** – Built predictive models with **Python & XGBoost**.
- **Heart Disease Prediction** – ML pipeline for patient data analysis, evaluated with accuracy & recall metrics.
- **Stock Market Trend Prediction** – Forecasted trends using **LSTM networks**.
- **Intelligent Complaint Analysis** – NLP text classification pipeline for customer complaints.

Speech & NLP Projects

- **Amharic ASR & Summarization** – Built a **speech-to-text system for Amharic** with automatic summarization of audio content. [GitHub Link](#)
- **AI Message Processor** – Developed an **intelligent message processing pipeline** for NLP-based text analysis and response generation. [GitHub Link](#)
- **Voice Agent STT** – Created a **real-time speech-to-text voice agent** for practical voice interaction applications. [GitHub Link](#)
- **Offline Real-Time STT System** – Built an **offline speech recognition system** capable of **real-time transcription** without internet dependency. [GitHub Link](#)

Education

BSc in Data Science – Bahir Dar University, Ethiopia | 2022 – 2026 (Expected)

- Relevant coursework: **Machine Learning, Deep Learning, Artificial Intelligence, Data Analysis**

Machine Learning Engineering, Data Engineering, and Financial Analysis Trainee – 10 Academy (Remote) | May 2025 – Aug 2025
